

About ModernTech Solutions

Empowering Healthcare Through Innovative Software

From a small startup to a team of 250, we build modern healthcare tools that put people first.

Our Story

Founded in 2010, **ModernTech Solutions** began as a passionate team of just 20 pioneers. Our mission was simple: rewrite the code of healthcare infrastructure. Over the past decade, that mission has sparked rapid, year-over-year growth. We don't just write software—we build lines of communication. By specializing exclusively in custom **Patient Management Systems** and **Telemedicine Platforms**, we help medical professionals connect with patients seamlessly, securely, and globally.
